27 July 64

MEMORANDUM FOR: Mr. Warner

SUBJECT: Committee Report On the Polygraph

1. Attached is a copy of the subject Committee report. All pertinent material has been underlined in red. It should take about 10 minutes to thoroughly peruse that material.

2. In general, the report is critical of the use of polygraphs in the Federal Government, and as a practitioner - Agency we are implicitly subject to criticism. Though the Subcommittee dimly views the use of this machine, it appears to take a more permissive stance where "top security agencies" are concerned.

3. Your particular attention is invited to the underlined paragraph at the bottom of page 25, and to the possible breaches of security which appear on pages 26 and 29.

4. In sum, I do not think that we should be particularly excited about this report.
